

## T自动反冲洗过滤系统 T Automatic Self-Clean Filtration System

- T 系列是由多个 T 型 2 寸或 3 寸叠片式自动反冲洗过滤器、2 寸或 3 寸反冲洗阀、控制器等组成高度集成自动清洗过滤系统。系统安装简单，运行高效。适用于首部或二级自动过滤系统，可有效过滤水源中的各类悬浮杂质。
- 流量范围 : 40-180m<sup>3</sup>/h
- T series is a highly integrated self-cleaning filter system which is combined by several 2" or 3" automatic backflush self-cleaning disc filter, 2" or 3" backwash hydraulic valve, controller etc.. It could be installed easily and work efficiency. Suitable for head or secondary filtration system to filter the water containing various suspended contaminants.
- Flowing Rate: 40-180m<sup>3</sup>/h

### 特点 Features:

- 操作简单 - 控制系统为中 / 英文界面，设置简单易操作。
- 节省人力 - 可全自动反冲洗同时系统稳定可靠，无需人工频繁维护。
- 节水节能 - 低水压低流量反冲洗设计，减少水电损耗。
- 可靠耐用 - 采用优质工程塑料制造，耐化学腐蚀，抗 UV 耐老化。
- Easy Operation: The control system is the Chinese / English interface, with simple and easy to operate.
- Saving manual labour: Program setting automatic backwash, less manual maintenance requirement.
- Saving Water and Energy: Maximum filtration efficiency based on minimum backwashing pressure required.
- Reliable and durable: Produced by excellent raw material which is of corrosion, chemical and UV resistant.

## 工作原理 Technology:

- 过滤状态: 控制器控制反冲洗阀开关方向使过滤器进入过滤状态: 水流先后通过系统进水管、反冲洗阀、过滤器进水口进入过滤器，水中杂质经叠片过滤后，清水从过滤器出水口流到系统出水管。
- Filtration Process: The controller controls the direction of the backwash valve to make the filter enter the filtration stage: The source water enters the filter passing through the system inlet pipe, backwash valve, and filter inlet one after another. Then the dirts stopped by disc and clean water pass through filter outlet to system outlet pipe.
- 冲洗状态: 控制器检测到系统进、出水口压差大于设定值后控制反冲洗阀改变开关方向，从而使该过滤器进入冲洗状态: 经其他过滤器过滤后的清水经系统出水管从该过滤器出水口进入并冲洗叠片后，污水通过过滤器进水口、反冲洗阀，排出到系统污水管。
- Backflush Process: After the controller detects that the pressure difference between the inlet and outlet is greater than setted value, it controls the backwash valve to change direction, so that the filter enters the flushing stage: The clean water filtered by other filters passes through the system outlet pipe to the filter outlet and flushing the discs, then the dirty water passes through the filter inlet, the backwash valve and discharged to the system sewage pipe.

## 水头损失表 Head Loss Data:

## 自动反冲洗叠片过滤器 Automatic Self-Cleaning Disc Filter

- 本系列过滤器为叠片式自动反冲洗过滤器，适用于首部或二级自动过滤系统，可有效过滤水源中的各类悬浮杂质。过滤性能稳定、高效，相比普通叠片过滤器，其具有反冲洗功能，大幅减少系统维护频率，节省人工，提高系统运行效率。
- This filter is automatic backflush self-cleaning disc filter, to be installed on head or secondary filtration system to filter the water containing various suspended contaminants. It is much more stable and efficient than manual disc filter by the auto back-wash which could reduce the maintenance frequency to save labor and improve the efficiency of system.

### 特点 Features:

- 节水节能 – 可低水压低流量反冲洗设计，减少水电损耗。
- 可靠耐用 – 采用优质工程塑料制造，耐化学腐蚀，抗UV耐老化。
- 高效过滤 – 过滤面积大，水头损失小；离心式进水设计，降低反冲洗频次。
- 低频维护 – 凹槽式反冲洗叠片，可实现表面过滤和深层过滤，自动反冲洗无需人工频繁维护。
- Highly Efficient Filtration: Less head loss and backflush frequency by large filtration area size and centrifugal water inlet.
- Saving Water and Energy: Maximum filtration efficiency based on minimum backflushing pressure required.
- Reliable and durable: Produced by excellent raw material which is of corrosion, chemical and UV resistant.
- Less Maintenance Effort: Less manual maintenance requirement, benefit from the enhanced and grooved autoflush disc which could be surface and depth filtration.

### 应用范围 Application:

- 农业灌溉系统的初级或者二次过滤系统。
- 工业循环用水的过滤系统。
- 污水处理的过滤系统。
- Primary or secondary filtration system for agriculture irrigation system.
- Filtration system for industrial circulating water.
- Filtration system for sewage treatment.

### 技术参数 Technical Data:

- 最高工作温度 : 60°C
- 连接方式 : 卡箍链接
- 最大工作压力 : 10 Bar (145 Psi)
- Maximum Working Temperature: 60°C
- End Connections: Grooved
- Maximum Pressure: 10 Bar (145 Psi)

		H4AD120V	120Mesh 4"Grooved	1

## 工作原理 Technology:

- 过滤状态: 滤芯上各叠片间被弹簧压紧, 水流从进水口进入再经过离心盘后产生离心效应, 使水中大颗粒重型杂质远离滤芯并集中于过滤器顶部, 其余微型杂质在跟随水流通过叠片滤芯缝隙时被阻挡达到过滤效果, 从而大大增加了过滤效率, 降低冲洗频次。
- Filtration Process: discs are compressed by a pre-loaded spring. The entering water passes through centrifugal structure, then being centrifugal effect flowing. The flowing enforce large contaminants away from discs. The water then passes efficiently through the discs thus small contaminants be trapped.
- 冲洗状态: 水流反方向进入过滤器并冲开弹簧, 滤芯上的各叠片互相散开, 反冲洗水流通过过滤芯架的小孔喷射向叠片并带动叠片旋转和颤动, 最终使附着在叠片上的杂质被冲走并从过滤器的排污口排出。
- Backflush Process: water enters the filter from the opposite direction and discs are released after spring elevating. Water are then forced through the nozzles on the spine and jetting forward to discs. At this stage the discs spin freely, loosening the trapped solids which are then flushed out.

Filtration Process

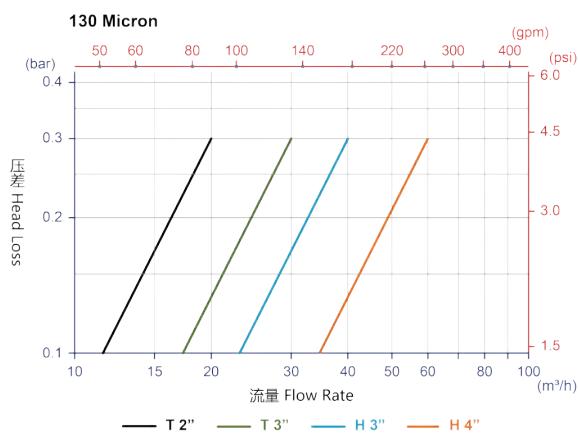

Backflush Process

## 手动叠片过滤器 Manual Disc Filter

- 本系列过滤器为叠片式过滤器，适用于小型过滤系统，可有效过滤水源中的各类悬浮杂质。过滤性能稳定、可靠。
- This series disc filters suit for small filtration system to filter the water containing various suspended contaminants. It supply stable and reliable filtration.

### 特点 Features:

- 经久耐用 – 采用优质工程塑料制造，耐化学腐蚀，抗 UV 耐老化。
- 低频维护 – 凹槽式叠片，过滤面积大，降低清洗频次。
- 可靠性能 – 离心式进水让大颗粒杂质远离叠片，水头损失小，实现高效过滤。
- Highly Durable: Produced by excellent raw material which is of corrosion, chemical and UV resistant.
- Less Maintenance: Less washing frequency benefit from grooved disc with large filtration surface.
- Reliable Performance: Centrifugal inlet water force the particles away from discs, that guarantee the high efficiency filtration with less head loss.

### 应用范围 Application:

- 小型农业灌溉系统的初级或者二次过滤系统。
- 工业循环用水的过滤系统。
- 污水处理的过滤系统。
- Primary or secondary filtration system for small agriculture irrigation system.
- Filtration system for industrial circulating water.

## Y型小型过滤器 Y Type Micro Filter

### 特点 Features:

- 外壳采用优质复合塑料生产，耐压、抗冲击、坚固耐用。
- 过滤内芯有不锈钢网和叠片两种可供选择，适应不同需要。
- 可过滤不同水质，广泛应用于农业和工业的水处理。
- 多种标准规格可供选择，满足不同需求。
- 易于安装和操作。
- Housings made of very strong plastic, designed to resist great pressure which can be used for long time.
- Two kind of filtration element, stainless screen and disc to be chosen to meet different requirement.
- Can treat different kinds of water source and apply for the water treatment both in Agriculture and Industry.
- Many sizes available can be met widely demands.
- Easy installation and operation.

## 过滤器反冲洗阀 Filter Backwash Hydraulic Valve

- 本系列阀门为 T 型两位三通阀，是一款双腔结构的液压驱动隔膜式水力控制阀。
- 本阀门结构设计精良，水力驱动行程短，水流方向改变时平稳顺畅，运行稳定。
- 阀体双腔结构设计，入口水流方向有角式流向和直通流向，可适应各种场景过滤系统安装。
- This valve is T shape 3-way hydraulic valve with double chambered, hydraulically operated and diaphragm actuated which is suitable for various automatic backwashing of filtration systems.
- Benefit from excellent short hydraulic travel structure designed, It could change flow direction smooth.
- With two chambers structure, this valve is available in Angle flow (A) and Straight flow (S). It can be flexibly installed in multiple orientation to adapt various filter system.

### 特点 Features:

- 工作顺畅 – 水力驱动行程短，水流向切换顺畅，有效避免清水与污水混合。
- 可靠耐用 – 双腔结构，所需驱动压力低，有效延长隔膜寿命。
- 耐候性好 – 优质塑料制造，阀体抗腐蚀、耐老化。
- 安装方便 – 角式流向与直通流向两种水流方式适合不同安装场景。
- Double Chambered: low actuation pressure required, extend the lifetime of the diaphragm.
- Durable Performance: Produced by excellent engineered plastic which is of corrosion and UV resistant.
- Reliable Performance: change flow direction smoothly based on short travel hydraulic actuation design to avoid mixing of supply and waste water.
- Easy Installation: two flow direction modes, Angle flow (A) and Straight flow (S), to fit various automatic filtration system.

过滤器反冲洗阀，角式 Filter Backwash Hydraulic Valve, Angle Flow		BHV0150A	2" 卡箍 Grooved	角式 Angle	1
		BHV0180A	3" 卡箍 Grooved	角式 Angle	1
		BHV01100A	4" 卡箍 Grooved	角式 Angle	1
过滤器反冲洗阀，直通式 Filter Backwash Hydraulic Valve, Straight Flow		BHV0150S	2" 卡箍 Grooved	直通式 Straight	1
		BHV0180S	3" 卡箍 Grooved	直通式 Straight	1
		BHV01100S	4" 卡箍 Grooved	直通式 Straight	1

## 尺寸 Dimension:

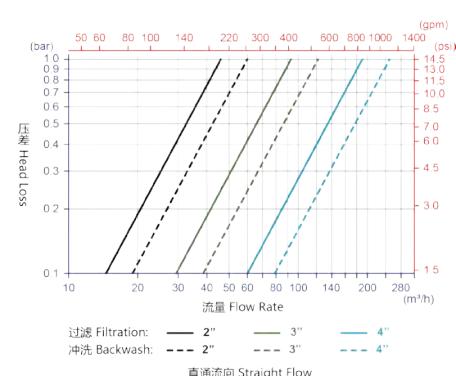

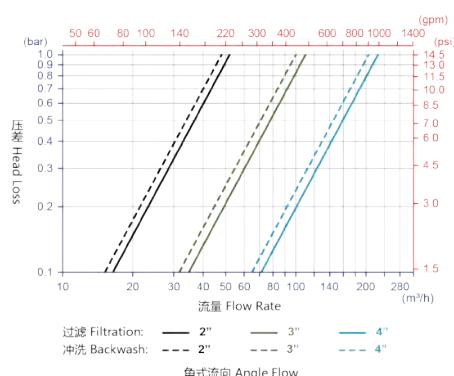

尺寸 (Size)					阀门流量系数 Flow Rate of Valve							
DN	Inch	W (mm)	D (mm)	H (mm)	角式流向 Angle Flow				直通式流向 Straight Flow			
					过滤 Filtration		反冲洗 Backwash		过滤 Filtration		反冲洗 Backwash	
					Kv	Cv	Kv	Cv	Kv	Cv	Kv	Cv
50	2"	232	160	274	52	60	48	56	46	53	60	70
80	3"	287	192	378	110	127	100	115	93	107	122	141
100	4"	357	260	464	225	260	205	237	190	220	250	290

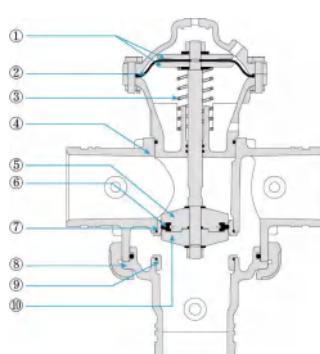

## 工作原理 Operation:

## 水头损失表 Head Loss Data:

## 产品结构图 Part List:

序号 Part	名称 Description
1	隔膜垫片 Diaphragm Washers
2	隔膜 Diaphragm
3	弹簧 Spring
4	阀体 Body
5	阀芯 Plug
6	O型圈 O-Ring
7	阀座 Seat
8	下部接头 Lower Adaptor
9	阀座 Seat
10	阀芯垫片 Plug Washer

## 自动过滤系统控制器

## Controller for Automatic Self-Clean Filtration System

FC01 系列是专门为自动过滤系统设计的模块化反冲洗控制器，内置电脑微芯片和程序编辑，通过水压传感器（信息输入）和电磁阀（信息输出）将反冲阀、过滤单元、持压阀等零部件组成自动反冲洗过滤系统，可按照设定程序在线自动轮流清洗每个过滤单元，实现整个系统的过滤杂质自动清理，同时又不间断过滤供水，不影响正常灌溉作业。

FC01 is a modular controller, build-in programed microchip, designed for automatic backflush filtration system. It combines the backwash valves, filters, pressure sustaining valves etc. to be a automatic backflush filtration system through pressure sensor (input signal) and solenoid valve (output signal). It could control each filter unit to be flushed automatically by turns. Based on this, the filtration system achieves supplying continuously cleaned water to irrigation system while washing filter units in same time. So that irrigation system works nonstop.

### 特点 Features:

- 配有定制的液晶彩色显示屏，显示界面简洁人性化。 • 中 / 英文双语言，程序设定简单易操作。
- 防水防潮设计，可适合不同工作环境。 • 10 个输出端口，可满足大部分系统过滤单元数量需求。
- 直流型自带 4 个 1# 电池或 5V DC 电源适配器，安全可靠，防止雷击。
- Equipped with a customized color LCD display which user interface is simple and user-friendly.
- Chinese/English dual language, the program setting is simple and easy to operate.
- Suitable for different working environments benefit from waterproof and moisture-proof design.
- Can meet the number of filter units in most systems by 10 output ports.
- Power Supply is 4 pcs D battery or 5V DC power adapter, which are safe and reliable and prevent lightning strikes.

### 功能 Features:

- 可以设定三种反冲洗启动模式：定时启动、压差启动、手动启动；
- 可以灵活地设置反冲洗时长、反冲洗间隔时长、压差检测反应延迟时长；
- 可自动统计反冲洗次数，便于定期维护；
- 可自动检测并显示输出反冲洗阀站的数量；
- 电池电压不足时，屏显上将显示低电压报警；
- 可一键恢复出厂时初始设置； • 自带操作提示，无需复杂操作手册。
- It can be set three flushing mode: by time, by different pressure, by manual.
- It can be flexibly set the flushing time, flushing interval, DP response time etc.
- It can record flushing count automatically, which is convenient for regular maintenance.
- It can automatically detect and display the number of backwash valve stations.
- When the battery voltage is insufficient, a low voltage alarm will be displayed on the screen display.
- The factory default settings can be restored with one key.
- It comes with operation tips, no complicated operation manual is required.

### 技术参数 Technical Data:

- |                   |               |
|-------------------|---------------|
| • 显示屏：液晶彩屏 3.5"   | • 输出站点：10 个   |
| • 输入电压：5-6VDC     | • 防水等级：IP65   |
| • 输出电压：12VDC 脉冲   | • 工作温度：0-60°C |
| • 输入压差范围：0-2.0Bar |               |

- Display: 3.5" Colorful LCD
- Input Power: 5-6VDC
- Output Power: 12VDC Latching
- Input DP Range: 0-2.0 Bar (0-29 Psi)
- Output Port: 10 Stations
- Waterproof: IP65
- Working Temperature: 0-60°C
